Professional Summary

Full Stack Developer with hands-on experience in building and deploying scalable web applications using the MERN stack (React.js, Node.js, Express.js, and MongoDB). Skilled in frontend and backend development, REST API design, authentication, database management, and performance optimization. Strong understanding of software engineering fundamentals, data structures, algorithms, and modern development workflows. Committed to delivering clean, efficient, and maintainable code while continuously learning emerging technologies.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, C++, SQL, HTML5, CSS3

Frameworks: React.js, Node.js, Express.js, Tailwind CSS

Databases: MongoDB, MySQL, SQL

Tools: Git, GitHub, Postman, Figma, SMTP, REST APIs, JSON

Software Engineering: Full Stack Development, Frontend Development, Backend Development, Web Development, Software Design, Debugging, API Integration

Core CS: Data Structures & Algorithms, OOP, DBMS, Computer Networks, Operating Systems

Professional Experience

Software Developer	Jan 2026 – Present
Swap Infotech Private Limited	Indore, India

- Developed and deployed a full-stack corporate website using React.js, Node.js, Express.js, and MongoDB, delivering 15+ business pages and improving the company's online presence for client acquisition.[Official Website]
- Enhanced and integrated 10+ secure RESTful APIs using Node.js and Express.js, enabling seamless communication between frontend and backend systems.
- Implemented SMTP-based automated email workflows, reducing manual communication efforts by 60
- Built 20+ reusable UI components using React.js and Tailwind CSS, ensuring responsive and consistent user experiences across all devices.
- Optimized frontend performance through code refactoring and asset optimization, reducing page load time by approximately 30
- Collaborated with 3+ stakeholders and designers using Git/GitHub workflows to successfully deliver 5+ production-ready features within project deadlines.

Projects

Doctor Appointment Booking Platform	Live Project
--	--------------

Tech Stack: React.js, Node.js, Express.js, MongoDB

- Create a full-stack healthcare platform supporting Admin, Doctor, and Patient roles with secure role-based authentication.
- Designed RESTful APIs and MongoDB schemas to manage appointments, scheduling, cancellations, and patient profiles.
- Implemented token-based authentication, validation, and exception handling, improving application security and reliability.

Village Inquiry & Data Portal	Live Project
--	--------------

Tech Stack: HTML5, Tailwind CSS, JavaScript

- Built a responsive web application delivering low-latency information access while enhancing user engagement and accessibility.

Education

Institute of Engineering and Technology, DAVV	Indore, India
Bachelor of Engineering in Information Technology	2022 - 2026

Certifications

- AWS Cloud Practitioner Essentials – Amazon Web Services (2025)
- Career Essentials in Generative AI – Microsoft and LinkedIn (2025)
